Primary Technologies
React | Vue | TypeScript | JavaScript | HTML | CSS

Tools
GCP | Docker | Copilot | Vitest | Playwright

Other Frameworks & Libraries
Next | Nuxt | Redux | Pinia | Tanstack Query

Backend & Databases
Node | Express | Fastify | REST | Postgresql

EXPERIENCE

Fullstack Engineer (Freelancer) — **Berlin, DE,Onsite,** *Nov 2023 - present*

- Developed full-stack applications from scratch using MongoDB or Postgresql, Fastify or Express, Nuxt/Vue or Next/React and Node; and deployed on Google Cloud Platform with Docker containerization
- Used Jest to reach 91% coverage across all core functions to minimize regressions
- Contributed more than 100 Open Source merged, Pull Requests including a dark mode feature for the Open Library which has 1,000,000+ monthly visitors
- Implemented CI/CD workflows with Github Actions combined with Unit, Integration and End-to-End tests

Fullstack Engineer (Contract) | Need4Deed — **Berlin, DE,Onsite,** *Oct 2025 - present*

- Partnered directly with the Lead Engineer to maintain a live production Next.js PWA, contributing 20,000+ lines of code as a leading developer.
- Created custom data-mutation hooks and URL filter deserialization.
- Isolated and resolved critical technical debt, including fixing infinite API fetches and refactoring a core debounce filter component to enhance platform speed.
- Debugged authentication flows, resolving edge-case search result filtering bugs, and reviewing code prior to staging and production deployment.

Fullstack Engineer (Project-Based) | Rosemary's Home Fitness — **Berlin, DE,Remote,** *Dec 2025*

- Deployed a high-performance, SEO-optimized Vue/Nuxt.js app from scratch in under two weeks with Headless CMS integration
- Utilised specific fonts for older users along with other WCAG concerns and scored 100 on Google Lighthouse's Accessibility score
- Engineered a custom server-side validation logic for the lead-gen form, reducing invalid business inquiries almost entirely and improving lead quality.

Frontend Engineer (ESG Contract) | e-Mission gmbH — **Berlin, DE, Onsite**, *March - Aug 2025*

- Engineered and maintained the frontend B2B SaaS ESG codebase using Vue/Nuxt with TypeScript, providing clients with automated sustainability metrics.
- Rebuilt the in-app video player with custom UI features, resulting in a 30% increase in engagement.
- Tested, tracked and implemented Google Analytics tags to monitor the user experience for users from Germany, Poland and China

EDUCATION

Full-Stack Developer Bootcamp — **WBS Coding School** — **On-site**, *July - Nov 2023*

Master of Research History — **Edinburgh University** — **On-site**, *Sept 2016 - Sept 2017*

BA Hons History (with Erasmus) — **Swansea University** — **On-site**, *Sept 2012 - Aug 2016*
